

MATH ENCOUNTERS

VOLUMES *and* VERSE: *a* MATHEMATICAL JOURNEY *through* LITERATURE

Speaker: Sarah Hart

Wednesday, July 10, 2024

Special introduction by Thomas Lin,
founder of *Quanta Magazine* and
Quanta Books.

Afternoon Presentation

4:00 pm ET (New York)

Evening Presentation

7:00 pm ET (New York)

National Museum of Mathematics

225 Fifth Avenue

New York, NY

We tend to think of mathematics and literature almost as intellectual opposites. In fact, however, the connections between them are profound. Join mathematician and author Sarah Hart to discover the hidden mathematical structures behind everything from poetry to novels, and reveal some of the beautiful mathematical imagery and symbolism in fiction, from simple fairytales to classics like *War and Peace*. You'll even create a book of poems that uses the power of math to turn just a few lines of verse into more than a thousand poems.

Register now at mathencounters.org to reserve your place!
