

X

Is missing

Could try guessing

Move numbers on both sides

Fitting around until it is there

We add, subtract, divide, and check again

With each step, the image at the end gets clearer and clearer

Till the blur becomes a story and answers start to shine through

Steps get smaller, the numbers are reduced, the variables lonely

The equation erased from the shroud of confusion

Now we see what x must be

Reduce the numbers

Just one step

Then it's

X
